PROFILE

Professional with experience in different projects in the field of **data analytics** and **data science**.

During my experience and trainings, I acquired solid knowledge in technologies and tools such as **Python**, **MySQL**, **Power Bi**, in different libraries such as **Numpy**, **Pandas**, **SciPy**, **Scikit-learn**, **Matplotlib**, **Seaborn**, **Plotly**, **Streamlit** and **Machine Learning** techniques such as **A/B testing**, **time series** analysis and **forecasting**, **supervised** (Regression and Classification) and **unsupervised** learning.

In addition to my experience in data analysis, I also have a strong background in recruitment and people management. In previous roles i was responsible for recruiting IT profiles and managing the entire recruitment process, which gives me a great insight into the IT Industry.
